

Table: Effect on mounting frequency of male rats after oral administration of sachet for short & long period

	No. of Dose/ Days	Total number (frequency) of mounting or mating / hour (3 male & 3 female)			
		Control (prior oral administration of sachet)	After oral ministration of sachet		
			1 st Hr.	2 nd Hr.	3 rd Hr.
Sachet (25mg/kg)	1 st day 1 dose	10	38	26	17
Sachet (25mg/kg)	2 nd day 3 doses	14	48	28	14
Sachet (25mg/kg)	3 rd day 4 doses	17	54	33	18
Sachet (25mg/kg)	4 th day 3 doses	18	68	49	33
Sachet (25mg/kg)	5 th day 6 doses	32	114	55	35

Aphrodisiac

1. Sachet given orally once a day does increase 4 times/ folds for desire mating as we can see 10 mountings on female rats in hour to be increased to 38 mounting on female rats. However decline in 2 hours.
2. If sachet continue been given for 5 days, it will increase the desire for mating from 10 times to 32 times in an hour. Then the intake of sachet can further enhance the desire for mounting to 114 times.
3. Conclusion the sachet when you taken daily for long period it can increase further your libido but the effect is only work for short period (2 days)
